

Vaccination Policy 2025 – Ministry of Health

- **Objective:** Ensure timely and universal access to all essential vaccines for children, adolescents, and adults in India.
- **Key Provisions:**
 - Routine immunization is provided free of charge at all public healthcare facilities.
 - Special vaccination drives shall target remote and underserved regions twice a year.
 - Electronic immunization records are to be maintained for all citizens under the National Vaccination Registry.
 - All vaccines administered must be WHO-approved, and cold chain protocols followed at every storage and transit point.
- **Implementation:** District Health Officers responsible for monthly monitoring and reporting.
- **Review:** Annual audit by an independent oversight body.
